

## Medical Terminology Training

---

### **Method of Delivery**

This is usually delivered as class-based or on-site training

**Duration:** This is usually delivered as a 3 hour or all-day session

**Who is this course for?** Anyone who uses medical terminology, or needs an awareness of basic medical terms, as part of their job role.

**Aim:** To cover the structure and origin of medical terminology

**Learning Outcomes** – at the end of the session learners will be able to:

- Define what medical terminology is
- Have a clearer understanding of the different ways medical terms are expressed
- Explain the rules that define how the majority of the words are constructed
- Have a clearer understanding of what each of these word parts means
- Use this knowledge to define some commonly used medical terms
